

Inclusive Learning through Managed **Virtual Reality**

Transforming Learning for Every Student

Transforming Learning for Every Student. Traditional education doesn't work for every learner. Some struggle with reading, writing, focus, or sensory processing.

Ulink's managed VR solution changes that

We combine:

- Managed XR (central control)
- Meta Quest VR devices
- Immersive learning applications

Creating a **safe, structured, inclusive environment**

What Makes this Different

Fully Managed VR Environment

- Central control of all headsets via Manage XR
- Teachers launch lessons to every device instantly
- No distractions, no unsafe content
- Structured & Safe Learning
- Locked experiences for focused sessions
- No need for complex setup or technical knowledge
- Designed for classroom and therapy environments
- Designed for Special Needs & Diverse Learners

Mindfulness & Sensory Support

- Calming immersive environments reduce anxiety
- Guided breathing and mindfulness experiences
- Ideal for sensory regulation and emotional control
- Sensory Deprivation Environments
- Controlled visual and audio stimulation
- Safe spaces for learners who feel overwhelmed
- Improves focus and reduces external distractions
- Virtual Robotics – Learning Without Barriers

Learning without **Barriers**

Why Virtual Robotics Works

- No heavy reading or writing required
- Visual, interactive, hands-on learning
- Learn by doing, not memorizing
- Learners who struggle in traditional classrooms can now engage, build, and succeed.

Skills Developed

- Problem-solving
- Logical thinking
- Creativity
- Spatial awareness

Why VR?

Benefits for Learners

- Increased engagement and attention
- Improved memory retention through immersion
- Reduced anxiety in controlled environments
- Inclusive access to coding and robotics
- Builds confidence and independence

Benefits for Teachers

- Full classroom control through Manage XR
- No need to manage physical robotics kits
- Easy lesson delivery across multiple learners
- Real-time observation of student engagement
- Reduced behavioral disruptions

The bigger **Impact**

The Knock-On Effect

- Better classroom participation
- Improved learning outcomes
- More inclusive teaching strategies
- Reduced teacher workload

This is not just a tool

It's a complete shift in how learning happens.

What Schools Do NOT Need

- No robotics kits to buy or maintain
- No complex infrastructure upgrades
- No additional technical staff
- No risk of unmanaged devices

The Conclusion

Ulink's managed VR solution combines technology, structure, and purpose to create an environment where every learner can succeed.

Especially those who have been left behind by traditional methods.
