

Welcome to Ulink

LINKING YOU TO SMART VR CHOICES

Ulink is a South African born education and technology partner, focused on making immersive learning safe, relevant, and accessible.

We specialise in six-degrees-of-freedom virtual reality, mixed reality, and emerging visual literacy tools that support real learning outcomes.

Our approach is platform-aware, curriculum-aligned, and designed for the realities of African education: shared environments, home learning, infrastructure constraints, and long-term sustainability.

EDTECH PARTNERS

We collaborate with VR Expert, Delightex, and ThingLink to bring world-class immersive learning technologies into South Africa through a trusted, education-first reseller model.

Together, we ensure that schools, universities, and organisations receive original products, local support, and curriculum-aligned solutions, not parallel imports or gaming-first tools.

This partnership allows Ulink to responsibly scale visual literacy, VR, and immersive content across South Africa with long-term sustainability in mind.

CURRICULUM FRIENDLY APPS

- Science & Biology
- Geography & History
- Mathematics & Spatial Thinking
- Coding & Robotics
- Art, Design & Creativity
- Wellness & Mindfulness
- Future skills & career exposure

“ Learners don’t just watch
they move, explore, and interact ”
– Frank Ai

VR HARDWARE OPTIONS

Managed Meta till 2030

- Safe, locked-down educational VR
- Non-drowsy 6DoF experiences
- Ideal for younger learners
- Easy teacher supervision
- Works in classrooms and at home
- Lower device footprint, faster rollout

Managed Pico 4s

- High-performance classroom VR
- Designed for shared environments
- Strong device management at scale
- Ideal for labs, training rooms & groups
- Higher throughput for multiple learners
- Built for institutional deployment

PARROT INTERACTIVE SCREEN

Touch LED Screen

- Touch technology provides a fast and intuitive interface for users.
- Computer literacy is no longer an issue – as interaction with your content is natural through touch gestures.
- No keyboard and mouse ensures a neat and efficient environment.
- Create a bright, colourful touch experience that engages and unites audiences in a classroom and beyond.
- Multi-Touch technology facilitates collaboration – greatly increasing productivity and profitability.
- Touch is no longer a new concept (i.e. tablets and smart phones) – as such children and adults alike will naturally adopt these larger formats.
- Interacting directly with your material ensures the focus of your audience is not divided like it would be using a laser, clicker or tablet.

VIRTUAL VALUE IN VR MANAGEMENT

Classroom Control & Safety

- Teachers decide what apps run, when, and for how long
- No unsafe content, ads, or random downloads
- Devices are locked, monitored, and updated remotely
- Students stay focused without constant discipline

Operational Efficiency & Scalability

- Central dashboard for all devices
- Easy rollout from one class to an entire school
- Shared devices, group learning, rotation models
- Less IT burden, fewer support issues

Learning Value & Outcomes

- Abstract concepts become visual and experiential
- Engagement increases without punishment
- Learners ask better questions
- Emotional and spatial memory improves retention

Our Vision

Make Immersive Learning Safe & Responsible

We believe immersive technology should protect learners first.

Ulink exists to remove risk, distraction, and uncertainty from VR so schools and families can adopt it with confidence.

- Safety before scale
- Learning before novelty
- Responsibility before hype

Our vision is to guide education from today's classrooms into tomorrow's reality.

- From 3DoF → Managed 6DoF → AI-assisted learning
- From screens → spatial understanding
- From memorisation → experience-based learning

We don't chase devices.

We build learning ecosystems that evolve with time.

Our Mission

Make Immersive Learning Safe & Accessible

Our mission is to remove risk, confusion, and distraction from immersive technology.

We deliver managed, age-appropriate XR environments that schools, families, and educators can trust.

Support Teachers, Not Replace Them

We exist to empower teachers, not overwhelm them.

By simplifying deployment, content control, and classroom flow, we help educators focus on teaching, not troubleshooting.

Build Learning That Lasts Beyond the Device

Our mission is to create long-term educational value, not short-term tech excitement.

We design systems that evolve from today's VR into tomorrow's spatial and AI-assisted learning.

Our Service

Managed VR Deployment

End-to-end setup of managed, locked-down VR for schools and learning environments.

- Device setup & configuration (Meta / Pico)
- Age-appropriate content controls
- Centralised app deployment
- No sideloading, no chaos, no guesswork

Teacher Enablement & Training

We train teachers to use VR confidently.

- Classroom management in VR
- Lesson flow: Create → Immerse → Review
- Casting, monitoring, and session control
- Pedagogy-first, tech-second approach

Curriculum-Aligned Content

Access to a curated library of educational XR apps aligned to real learning outcomes.

- TEM, History, Geography, Art, Coding & Robotics
- Platforms like Delightex, ThingLink, Open Brush, Future Class
- Content reviewed, updated, and classroom-ready

Ongoing Support & Growth

Long-term partnership, not a once-off device drop.

- Technical support & troubleshooting
- Content updates & platform evolution
- Optional annual renewal (no forced lock-in)
- Roadmap toward future XR & AI wearables

Let's Build the Future of Learning
