

UlinkXR Immersive Learning Solution

Transforming Education through the Pico 4 VR Ecosystem

UlinkXR provides schools with a **fully managed Virtual Reality (VR) and Extended Reality (XR) learning solution** designed to enhance engagement, improve understanding, and modernize classroom delivery.

The platform combines **Pico 4 VR headsets, a curated educational content library, and centralized teacher management tools** to create an immersive learning environment that is simple for educators to operate and scalable for schools.

UlinkXR is designed for **ECD centres, primary schools, high schools, and remedial learning environments**, providing learners with interactive educational experiences across multiple subjects.

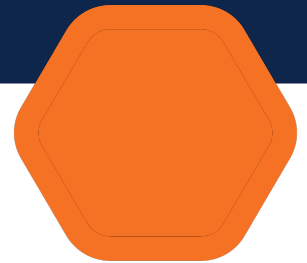

Each classroom solution includes:

- **Pico 4 VR Headsets** (starting from 4-device classroom bundles)
- **Smart Charging & Storage Kit** (secure flight case with charging system)
- **Teacher Control Tablet** (Samsung Galaxy A9)
- **UlinkXR Classroom Dashboard**
- **Pre-loaded Educational App Library**
 - Delightex
 - ThingLink
 - Curated VR education applications
- **Cleaning and device maintenance accessories**
- **Centralized device and classroom management**

The system allows teachers to **control all headsets from one dashboard**, launch lessons simultaneously, and monitor usage and engagement.

Key Benefits for Schools

Teacher-Friendly Control

Teachers can manage all devices from a central dashboard, including launching lessons, pausing sessions, and broadcasting content to multiple learners simultaneously.

Immersive 6DOF Learning

Unlike basic VR systems, Pico 4 provides **6 Degrees of Freedom**, allowing learners to move naturally within the virtual environment, resulting in better engagement and understanding.

Curriculum-Friendly Learning

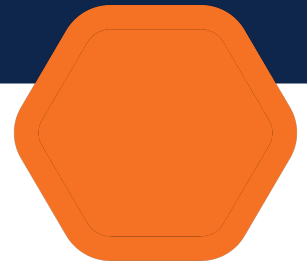

The platform provides **educationally relevant experiences across STEM, geography, science, arts, and historical simulations**, supporting curriculum enrichment.

Scalable Deployment

Schools can begin with **small headset bundles** and expand to full classroom deployments as adoption grows.

Centralized Content Management

All content is **curated and managed by UlinkXR**, ensuring teachers always have access to high-quality learning experiences without technical complexity.

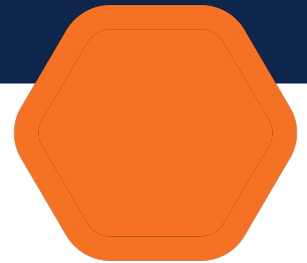

Managed Service Level Agreement (SLA)

UlinkXR provides an optional **Service Level Agreement (SLA)** to ensure schools receive continuous support and system reliability.

The SLA includes:

- Ongoing **content updates**
- **Technical support and troubleshooting**
- **Teacher support and onboarding**
- **Usage analytics and reporting**
- Remote device and software management
- Ongoing system optimisation

This ensures the solution remains **reliable, updated, and easy to use throughout the term and academic year.**

School Governing Body (SGB)

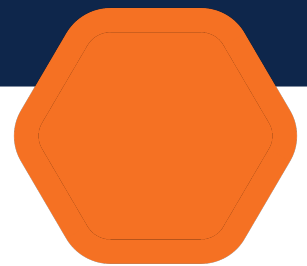

UlinkXR offers a **structured presentation for School Governing Bodies** to assist schools in evaluating and approving immersive learning technology.

The SGB presentation covers:

- Educational value and curriculum relevance
- Classroom safety and device management
- Cost structure and funding options
- Section 21 allocation that qualifies as learner teacher support material, centralizing lab costs into a single, multi-use asset.
- Flexible termination, an initial 36-month foundation term followed by a 30-day "Safety Valve" notice period, protecting the school against unforeseen budget cuts.
- Demonstration of learning experiences
- Long-term educational impact

This presentation helps **school leadership and parents understand the benefits and implementation strategy.**

This structure allows schools to **introduce advanced educational technology without large upfront capital expenditure.**

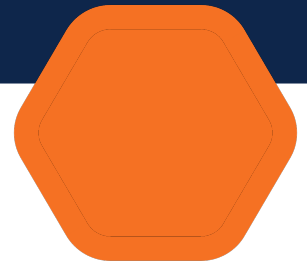

Why Schools Choose UlinkXR

- Curriculum-aligned immersive learning
- Fully managed VR ecosystem
- Minimal teacher technical requirements
- Scalable classroom deployment
- Continuous content updates
- Financial option
- Dedicated support and training

UlinkXR enables schools to **bring the future of education into today's classroom.**

By adopting the **Pico 4 Universal Learning Hub**, is not just buying screens it's investing in **equitable, high-retention education.**

We take the technical risk your teachers take the pedagogical lead.
