

"CODING AND VIRTUAL REALITY- DELIVERED AS A SERVICE, NOT A RISK"

Ulink removes the pressure from schools by providing coding & visual literacy as a managed on- site service.

Compulsory Requirement

- **Teacher Presence:** Teachers should be present during the visit to provide support to learners and assist with the lesson where required.
- **Reliable Internet Access:** Stable and reliable internet connectivity must be available for the duration of the session.
- **Electricity Supply:** Continuous access to electricity is required to power all devices and equipment used during the lesson.
- **Wi-Fi Access:** Wi-Fi connectivity should be available to enable the use of digital resources and facilitate the interactive components of the lesson.

How It Works

Step 1 – Create

- **We bring the hardware** – you use the laptops & VR headsets.
- **Laptops** – Will be used for building scenes and creating.
- **Coding** – Coblocks, Typescript and Python will be taught in an accessible way.
- **Guided Lessons** – Mission Aligned Coding and Virtual Robotics Gamified to the Curriculum
- **Duration:** 30-45 minutes and 15-20 minutes on headset

How It Works

Step 2 – Immersion

- **We bring the hardware** – We will bring VR headsets for viewing creations.
- **VR Headsets** – Pico headsets with 6 degrees of freedom maintain comfort.
- **Your Creations** – View your very own creations and those of your friends.
- **Duration:** 15-20 minutes

How It Works

Step 3 – Ulink Returns

- **We return after 2 weeks** – We will return after 2 weeks to continue the guided lessons. Previous progress can be saved, so nothing is lost.
- **Build your portfolio** - Save all your creations in your Ulink2U Content Locker to never lose what you have created.

Comprehensive Learning Plans (Grades 0–12)

Learners engage with multiple applications covering:

- **STEM & Coding** – Hands-on programming with real-world applications.
- **Gamification & Collaboration** – Interactive, multiplayer environments for engaging learning.
- **Problem-Solving & Critical Thinking** – Enhancing logical reasoning skills.
- **Language & Literature** – Supporting cross-curricular literacy development.
- **Social Sciences & Digital Citizenship** – Teaching ethical and responsible technology use.
- **Programming Languages** – Learning Python, Coblocks, and Typescript in an accessible way.

Linking you to Delightex

- **Block-based Coding** - Making coding simple with drag-and-drop coding.
- **Fun & Interactive** - With dedicated apps for VR, tablets and phones, creations can be viewed anywhere.
- **Learner flexibility** - Supports block-based coding typescript and Python for all ages.
- **Easy to Set Up** - Browser based drag-and-drop 3D programming.
- **VR & AR Exploration** - Creations can be explored in 360°/3D using VR headsets.
- **Collaboration** - Learners can work together on the same project, building teamwork.

Why this service makes sense?

- Curriculum-friendly coding and digital literacy
- Cancel at any time – no long-term commitment
- Immediate teacher exposure and training
- Fully managed service model
- No expensive infrastructure required
- Hands-on learner engagement
- Scalable for schools

Whats included?

- 2 x Ulink coders onsite with learners.
- 2 hrs, 2 times a month.
- 2 x Laptop and 2 x VR Headset included.
- Mission Aligned Projects.
- Create and Immerse in Learners Worlds.
- Learner's view and test work across multiple devices.
